## Updated International Travel Guidelines

### Effective April 13, 2021

---

On April 1, 2021, the District advised the school community that New York State was no longer requiring quarantine for domestic travel if asymptomatic. Just this weekend, the state updated its travel guidelines for international travel. Below, please find the current New York State International Travel Guidelines:

*“CDC and NYS recommends **delaying** international travel until the traveler is fully vaccinated.*

*International travelers must comply with [CDC requirements](#), which currently include proof of negative test or recent COVID recovery in order to board airplanes headed to the US. Travelers must complete the [NYS Department of Health traveler health form](#).*

*Currently the CDC does not require quarantine, work furlough, or testing requirements for asymptomatic international travelers.*

*New York follows that recommendation with the following exceptions:*

- *Fully vaccinated individuals who have not recovered from COVID-19 in the past 3 months are recommended to get tested 3-5 days after arrival in New York from international travel.*
- *All unvaccinated international travelers who have not recovered from COVID-19 in the past 3 months are recommended to get tested 3-5 days after arrival in New York, consider non-mandated self-quarantine (7 days if tested on day 3-5, otherwise 10 days), and avoid contact with people at higher risk for severe disease for 14 days, regardless of test result.”*

As always, before travel the District encourages the school community to check the [NYS Travel Guidelines](#) to determine how your travels may impact a student’s ability to return to school. Should you have questions please feel free to contact the Department of Health.
